## ARCHITECT PATRICK AHEARN RELEASES HIS NEW BOOK

Coffee tables, living rooms and libraries everywhere have a beautiful new book to showcase, as Patrick Ahearn, one of New England's preeminent classical architects, has released the display-worthy new monograph, *Timeless: Classic American Architecture for Contemporary Living*.

Beyond its striking good looks, *Timeless* reveals the theories and practices that have made Ahearn the success he is today. Ahearn, a Fellow of the American Institute of Architects, has an innate ability to balance the romance of traditional architecture with the tenets of modernism, creating incomparable settings that are steeped in a sense of place yet reflective of how people like to live in the 21st century.

While Ahearn, principal of Patrick Ahearn Architect, has designed over 500 homes in some of the most sought-after destinations in the world, *Timeless* showcases 18 of these iconic properties that all, in their own fashion, shed light on the guiding principle of Ahearn's greater-good theory. That is, "that architecture has the power to improve lives, increase happiness and to encourage friendly and familiar interactions."
